The National Alliance, along with over 100 other organizations, signed onto this letter to the Treasury Department that calculated “affordable health insurance coverage for all.” This report highlights the need for affordable health care, and it is an effort to promote awareness and prevention for tobacco use. The U.S. Surgeon General recently released a new report, Preventing Tobacco Use Among Youth and Young Adults: A Report of the Surgeon General. This report describes the scope of health consequences of tobacco use and the health effects of2ndhand smoke. The report presents data that demonstrates the tobacco epidemic is centered in young people, with over 6 million middle schoolers and 3 million high schoolers smoking. Tobacco use is the number one preventable cause of death. For more information, visit the Surgeon General’s first-ever website at www.smokefree.gov.

New National and State Transition Findings Presented
Our presentation elaborated on the factors affecting these national and state transition findings presented at the recent annual meeting of the Association of Maternal and Child Health Programs. In an effort to promote awareness and prevention for tobacco use, the Affordable Care Act requires states to expand Medicaid by providing coverage to individuals with incomes up to 138% of the federal poverty level, effective January 1, 2014. The Federal Health Care Transition Center, recently prepared a set of national and state expansions of Medicaid and CHIP. These expansions are intended to provide insurance for an estimated 11 million Americans at risk youth, and other fact sheets on the National Alliance, as part of its ongoing collaboration with the National Adolescent Health Clearinghouse and other organizations, including the Bazelon Center for Mental Health Law website.

The expansion is intended to provide insurance for an estimated 11 million Americans at risk youth, and other fact sheets on the National Alliance, as part of its ongoing collaboration with the National Adolescent Health Clearinghouse and other organizations, including the Bazelon Center for Mental Health Law website.

New Legislative Proposals
We have over 200 co-sponsors of the bill, including representatives from the House of Representatives. In early March, after the bill was resolved, the idea has received a good deal of interest from key stakeholders, including health care providers, policy makers, and other experts in the field. The Affordable Care Act requires states to expand Medicaid by providing coverage to individuals with incomes at or below 133% of the poverty level, effective January 1, 2014. The Federal Health Care Transition Center, recently prepared a set of national and state expansions of Medicaid and CHIP. These expansions are intended to provide insurance for an estimated 11 million Americans at risk youth, and other fact sheets on the National Alliance, as part of its ongoing collaboration with the National Adolescent Health Clearinghouse and other organizations, including the Bazelon Center for Mental Health Law website.
